

Name: Pallavi Dadape

Roll No.: 43239

College ID:

Problem Statement:

Using HTML5 layout tags develop an informative page with sections that include various images, links to other pages for navigation, make use of all possible formatting (for example font, color, etc.).

```
            
```

```
        </div>
```

```
        <p> Greetings folks! </p>
```

<p> There are two types of people in the world. One who like reading book and the other who don't. I belong to the second category who doesn't like reading books. But this website is for the first type of people who like reading books. </p>

<p> Many a time what happens is that when we go out to buy a book from the stores, we don't realize that we already have books in our shelves at our homes and that there is no space to keep the new ones you are buying. Hence I thought of this idea - an online bookshelf. You can have your own bookshelf with all the books you wish to read from our collection. </p>
